MADE IN FRANCE

STS

Speed Thrusters Swimmer

The back of the swimmer remains free for operational efficiency.

The STS allows for comfortable long-distance coverage at maximum speed while leaving the operator's hands free during underwater, maritime or riverine progression.

+ 2 hours at + 2 knots

Datasheet of STS

Usage time	+ 2 hours at + 2 Knots
Optimized speed of movement	2 Knots
Peak speed	2.5 Knots (in closed-circuit rebreather without load)
Usage time 2.5 Knots	More than 1h45 (valited during diving)
Weight in air, in usage configuration	22 Kg
Weight in water	- 6 kg (adjustable)
Maximum operating depth	50 meters
Respiratory device position	Chest-mounted or Back-mounted – Oxy – Blending - Air

The composition of the STS kit

Storage and transport	Foam-lined case, compartmentalized
1 right thruster	1 interchangeable motorization (motor + propeller + nozzle) 1 pack lithium-ion energy and control equipped with : - 4 LED indicators showing the battery levels - 1 power control lever - 1 emergency stop and shutdown button - Ruggedized connectors for intensive use
1 left thruster	1 interchangeable motorization (motor + propeller + nozzle) 1 pack lithium-ion energy Ruggedized connectors for intensive use
1 battery pack interconnection cable	2 connectors etiro wire connections, fits ein the belt
1 belt kit and harness	1 clip suspender, 2 belts (S/M et L/XL), 1 buoyancy belt, 2tight straps, 2 belt/thruster interfaces
2 chargers	1 for each energie pack
1 ou 2 dischargers	Option
1 data reader	Option
1 maintenance kit (NTI1)	2 propellers, 1 nozzle, 1 seal kit, 1 tool kit
1user manual on USB key	French / English
1 maintenance guide	Parts list and refence numbers
Color	Black Mat
warranty	1 year, parts and labor, direct with Extrem' Vision
