1. Board Policy

Policy for Quality – Environment

Company profil:

System integrator for harsh environments, Extrem' Vision, a company who is growing since 1996 offers innovative optronic solutions meeting the present expectations and future needs of its customers, both in terms of quality, performance, reliability and respect of delivery's deadlines.

Our commitments:

Our Quality / Environment policy is based on the capacity of all the actors of the company to answer with quick response and flexibility to the fast changing technologies and markets, to the legal requirements applicable to our business and the protection of the environment.

Our commitment to our customers is to achieve excellence on a daily basis, through a continuous improvement process.

In an Eco-design approach, we also make the commitment to reduce the environmental impact of our products and services, to prevent environmental pollution and to protect biodiversity.

This approach is supported by an Integrated Management System meeting the requirements ISO 9001 and ISO 14001 standards.

The employees of the company accompany me daily in the commitment of determining and putting in place the human, financial, organizational and technical resources to achieve the following objectives:

- Develop our turnover both in France and export with an improved performance of research projects,
- Continue the analysis of significant improvement points in our environmental impact and the implementation of corrective measures (waste, paper consumption, workshop waste),
- The optimization of internal and external communication in a process aiming a total satisfaction of the involved parties.

I gave responsibility to our Quality / Environment Manager to control and manage the implementation of this Quality - Environment policy to achieve these goals.

Rivesaltes, July 25th, 2018

Stéphane GOUVERNEUR
President / CEO
